

KG Store Simple Workflow Guide

One-page guide for request, purchase order, receiving, and issue flow

Use this as the quick reference for daily store operations.

MAIN FLOW

1. Employee creates asset request.
2. Manager/Admin approves or rejects.
3. Store checks available stock.
4. If stock is enough: reserve and issue.
5. If stock is short: create PO/OP.
6. Add item cost, transport, SGST/GST.
7. Send order to vendor.
8. Store receives items against PO.
9. System adds received quantity to stock.
10. Store proceeds to issue items.

COST FIELDS TO CAPTURE

- Item unit price and quantity.
- Transportation / freight cost.
- SGST and GST values.
- Vendor and expected delivery date.
- Final total before confirming PO.

IMPORTANT RULES

- Do not issue more than available stock.
- Every shortage needs PO before issue.
- Receiving PO items must increase stock.
- Keep request status updated at each step.
- Recheck totals before closing purchase.

STATUS MEANING

- Pending: waiting for approval.
- Approved: request accepted.
- Shortage: stock is not available.
- PO Required: purchase must be created.
- PO Ordered: vendor order placed.
- Partially Received: some items received.
- Received: items added to stock.
- Issued: items given to employee.
- Rejected/Closed: no further action.

WHO DOES WHAT

- Employee: create request and track status.
- Manager/Admin: approve or reject.
- Store Manager: stock, PO, receive, issue.
- Purchase/Admin: vendor, cost, tax checks.
- Finance: verify totals when required.

NEXT ACTION GUIDE

- If Shortage: create PO/OP.
- If vendor delivers: receive PO items.
- If stock becomes available: issue items.
- If issue is done: request becomes Issued.
- If rejected: close with clear reason.

Quick check: Request approved -> Stock checked -> PO if shortage -> Receive -> Issue -> Close
